

Trade fair profile

imm cologne presents the world of furnishings of the future. At the beginning of every year the trade fair presents new and surprising international home trends and numerous marketable innovations. The broad range on offer is combined with high standards of quality and an excellent presentation of the products. The fair also provides an effective platform for young designers. The trade visitors value the trade fair's pronounced business atmosphere and high standards of organisation and services. The two days of the fair that are also open to end-consumers provide the exhibitors with ample opportunity for product tests and for collecting consumer suggestions. In close connection with the extensive programme of events that will take place all over the city of Cologne, imm cologne is for one week the centre of the international worlds of furnishings and design.
